AI tool/model: ChatGPT; GPT-5.6 Luna

Task ID/Title: User Stories #1-#10 Generated by AI

Purpose of AI Use: Generating User Stories

Chat Link: <https://chatgpt.com/share/6ab6b09d-3784-83ea-883b-a60ee51e6146>

AI-Suggested Content for user Stories:

The AI generated the following 10 user stories for CareerConnect:

1. Create an account
2. Log in
3. Manage my profile
4. Upload a resume
5. Search for jobs
6. Filter job listings
7. Apply for a job
8. Track application status
9. Save jobs
10. Receive application reminders

Validation:

Each User story covers the basic features of Career Connect and covers basic functionalities that a user will need.

Decision: Accepted

The entire team reviewed each user generated story and agreed that they were good for the project.

Reflection: AI was useful in this instance as it acts as a user itself and aligns with our requirements for this project.

Task ID/Title: [Task #3.2 - Front End Upload Resume Feature](#)

Purpose of AI Use: Styling UI with CSS

Chat Link: <https://chatgpt.com/share/6ab999ef-6500-83ea-838e-5a697e59e4fc>

Validation: Implemented the CSS Tailwind UI layout to the resume-upload file page and UI visibly works as intended

Decision: Accepted

The CSS Tailwind Suggested UI made by Chat GPT gives a good starting foundation for displaying information on the screen. In the future, UI will change based on future features/requirements or even just pure styling which is low priority right now.

Reflection: Styling UI is time consuming for the daily developer and AI does a better job at suggesting website UI layouts.

Responsible Person: Matthew Lazarov

Team-Generated User Stories and Features:

1. Creating Jobs
2. Managing Candidates
3. Job Recommendation
4. Multiple Resumes and Cover Letters
5. AI Agent
6. Messaging Users
