

# Sprint 1 AI Usage Log - Ray Ntukanyagwe

Entry number: 1

Date: 2026-09-27

AI tool/model: Claude

Task ID/Title: Password validation on the login page

Purpose of AI Use: Get a regex for a password with an uppercase letter and a number

Chat Link: [https://claude.ai/code/session\\_01DefoKAUWZLqAMSUurBSbsV](https://claude.ai/code/session_01DefoKAUWZLqAMSUurBSbsV)

AI-Suggested Content: `^(?=.*[A-Z])(?=.*\d){8,}$`, using lookaheads and an 8-character minimum

Validation: Tested the pattern against valid and invalid passwords in the form.

Decision: Accepted

Reflection: Faster than working out the regex myself.

Responsible Person: Ray Ntukanyagwe

Entry number: 2

Date: 2026-09-27

AI tool/model: Claude

Task ID/Title: Login page, redirecting after sign-in

Purpose of AI Use: Find the standard way to send the user to another page after login

Chat Link: [https://claude.ai/code/session\\_01DefoKAUWZLqAMSUurBSbsV](https://claude.ai/code/session_01DefoKAUWZLqAMSUurBSbsV)

AI-Suggested Content: `router.push("/dashboard")` in a client component, or `redirect()` in a Server Action

Validation: Confirmed it matched what our login page already does, and tested it worked.

Decision: Accepted

Reflection: Confirmed the approach we used was the right one.

Responsible Person: Ray Ntukanyagwe
