

AI-Generated User Stories

US-01: User Registration

As a job seeker, I want to create an account so that I can access CareerConnect and manage my job search.

US-02: User Login

As a registered user, I want to log in securely so that I can access my personal account and saved information.

US-03: Profile Management

As a job seeker, I want to create and update my profile so that recruiters can view my professional information.

US-04: Resume Upload

As a job seeker, I want to upload my resume so that I can store and use it when applying for jobs.

US-05: Job Search

As a job seeker, I want to search for job opportunities using keywords so that I can find relevant positions.

US-06: Job Filtering

As a job seeker, I want to filter job postings by criteria such as location, job type, and salary so that I can narrow down relevant opportunities.

US-07: Job Application

As a job seeker, I want to apply for a job through CareerConnect so that I can submit my application efficiently.

US-08: Application Status Tracking

As a job seeker, I want to track the status of my job applications so that I can monitor my progress through the hiring process.

US-09: Recruiter Job Posting

As a recruiter, I want to create and publish job postings so that qualified candidates can discover available positions.

US-10: Saved Jobs

As a job seeker, I want to save job postings to my favourites so that I can easily return to opportunities I am interested in.

Team-Generated User Stories and Features:

US-11: Two Factor Authentication

As a user, I want to be able to protect my credentials from any identity theft.

US-12: Application Reminders

As a job seeker, I want to receive notifications and reminders about my applications so that I do not miss important deadlines or updates.

US-13: Managing Candidates

As a recruiter, I want to be able to see which applicant applied for the job, what their resume looks like, and who are the top applicants that applied based on skill requirements.

US-14: Job Recommendation

As a job seeker, I want to be able to see jobs that are being recommended to me based on my given skill set

US-15: Multiple Resumes and cover letters

As a job seeker, I want to be able to upload multiple resumes and cover letters (French, English, ect...)

US-16: - AI Agent

As a job seeker, I want to have an AI agent that creates my cover letter based on my CV, skills, and extra input

US-17: - Messaging Users

As a job user, I want to be able to contact recruiters and network with other fellow job seekers.

Comparison and Result of AI-generated and Team Generated User Stories

1. **Stories related:** Team story US-11 is related to AI Story US-1 and US-2

Comparison and Result:

AI suggested a user should create and login but did not suggest anything about making sure that there should be a security mechanism for protecting the user in case of a data breach. We thought it would be a good idea to make sure customers would know they are safe when using our platform.

2. **Stories related:** Team story US-12 is not associated to any AI story

Comparison and Result:

AI did not suggest anything about creating reminders, but the project requires reminders so we thought it was a good user story to implement.

3. **Stories Related:** Team story US-13 is related to US-9

Comparison and Result:

AI suggested a recruiter must be able to create job postings but did not recommend how a recruiter must manage who gets accepted and being able to review which candidate is most suitable for the job. That is why the recruiter must see all the information of the job seeker.

4. **Stories Related:** Team story US-14 is related to US-5 and US-6

Comparison and Result:

AI suggested that a user must be able to search and filter through jobs manually, but did not suggest there must be an algorithm to be able to suggest jobs being recommended to the user based on their skills. A user would prefer getting jobs recommended to them rather than manually checking each job. Or else, it would be time consuming.

5. **Stories Related:** Team story US-15 is related to US-4

Comparison and Results:

AI suggested that a user is able to upload a resume, but did not suggest that a user is able to upload many resumes since there is the case of having multiple languages. Also AI did not suggest to include cover letters when applying to jobs.

6. **Stories Related:** Team story US-16 is not associated to any AI story

Comparison and Result:

AI never suggested that there must be an additional AI agent that is able to create cover letters based on resumes and additional input information from the user such as skills and format, syntax. So we decided to make it our unique feature of the project.

7. **Stories Related:** Team story US-17 is not associated to any AI story

Comparison and Result:

AI never suggested the recruiter and job seeker could be able to communicate through the platform. Therefore, we suggested users are able to network as it would make the website up to date with other current existing job websites.
